Lf-D. Bayuk-response to DEQ FFS comments.pdf

Dana – Thank you for scheduling the meeting with EPA on May 27th. Attached please find a letter providing additional analysis of iron in groundwater at Siltronic. The analysis was performed in order to facilitate and inform agency discussions, and address potential risks associated with implementation of an EIB PRB at the riverbank. In support of this letter and for reference, I have also attached our response to DEQ's comments on the Siltronic FFS.

Please don't hesitate to call or email if you have any questions.
